WHY FACILITIES CHOOSE US

One vendor. One invoice. One number to call.

Citywide Safe & Lock has secured Baltimore businesses since 1984. We are family owned and operated, licensed, insured and bonded under Maryland locksmith license #717 — and the people who survey your facility are the ones who show up to do the work.

Every job is quoted over the phone before we dispatch, and our technicians charge only what you were quoted. If hardware can be repaired instead of replaced, we repair it. Doors, high-security locks, access control, cameras and safes — one vendor for all of it.

> "Our number one priority is getting you back to enjoying your day as quickly as possible."

TURNOVER COMBOS

Combinations changed the day cleared staff leave — on site, usually in a single visit, with the paperwork your security officer expects.

PREVENTIVE MAINTENANCE

Annual inspections, bolt-work adjustment and drawer service that prevent lockouts and keep containers compliant.

Manipulation and decoding first — back in service the same visit.
